018000 STANDARD PRACTICE & GUIDE FOR BUILDING ENCLOSURE COMMISSIONING (ASTM E 2813, E2947)

Standard Practice Definition: A Standard practice is a compendium of information or series of options that does not recommend a specific course of action. Guides are intended to increase the awareness of information and approaches in a given subject area. Guides may propose a series of options or instructions that offer direction without recommending a definite course of action. The purpose of this type of standard is to offer guidance based on a consensus of viewpoints, but not to establish a standard practice to follow in all cases.

PART 1: GENERAL

1.01 This guide is to provide consultant teams and Cornell staff with information and awareness of industry standards that can be utilized for the development of project specific Building Enclosure Commissioning requirements. This guide should be referenced when the desired scope of work involves the installation or replacement of building envelope systems on campus.

PART 2: REFERENCED DOCUMENTS

2.01 Standard Practice for Building Enclosure Commissioning. (ASTM E2813)

2.02 Standard Guide for Building Enclosure Commissioning. (ASTM E2947)
