NOTES:
1.0 Use (2) 45° elbows instead of (1) 90° at direction changes.
2.0 Install cleanout at every other direction change (minimum), preferred is every direction change.
3.0 Verify foundation drain layout prior to backfilling (Design Standard 334600).
4.0 Designer to consider adding secondary cleanout facing downstream at critical, deep or difficult to access sections of pipe (see detail 1.7.2).
